DETAILED ACTION

This Office Action is in response to the amendment filed March 18, 2011, amending claims 86, 92, 114, 120, 129, 133-135, 148, 154, 170 and 175. Currently claims 86-176 are pending.

Allowable Subject Matter

1. The indicated allowability of claims 129-135 and 176 is withdrawn in view of the newly discovered reference(s) to Lam (US Patent No. 5,867,818). Rejections based on the newly cited reference(s) follow.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re*

Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 129-134 and 176 rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 21-23 of U.S. Patent No. 5,867,818. Although the conflicting claims are not identical, they are not patentably distinct from each other because the processes of the method invention of claims 21-23 encompass the functions of the apparatus claims of 129 and 176, wherein both sets of claims are directed to executing programming means utilizing configuration states interacting with paths (or events).

Allowable Subject Matter

4. Claims 86-128 and 135-175 are allowed.

Response to Arguments

5. Applicant's arguments with respect to claims 129-134 and 176 have been considered but are moot in view of the new ground(s) of rejection.
